EDUCATION

Kwame Nkrumah University of Science and Technology - Kumasi, Ghana

Expected Graduation: 2029

Major: BSc. Computer Engineering

Relevant Coursework: Calculus, Linear Algebra, Data Structures and Algorithms, Introduction to Databases
Object-Oriented Programming, Software Engineering, Introduction to System Design, Introduction to Machine Learning

TECHNICAL SKILLS

Programming Languages: Java, Python, TypeScript, C/C++, C#,

Developer Tools: Raspberry Pi, Bootstrap, PostgreSQL, APIs, React, Storybook, Github, Git

EXPERIENCE

Hardware Intern, *DIPPER Lab - KNUST*

Sep 2026 - Present

- Design and refine custom PCB layouts, optimizing component placement and trace routing for compactness, manufacturability, and reliable electrical connections.
- Gain practical experience with PCB prototyping and fabrication using the Voltera V-One, translating digital PCB designs into physical prototype boards.
- Develop hands-on SMD soldering and electronics assembly skills.

Software Engineering & Program Management Intern, *Microsoft Corporation*

May 2024 - Aug 2024

- Collaborated with two software engineering interns to design and develop an activity and history tracking feature for Xbox game publishers.
- Co-authored technical and product specifications, translating feature requirements into actionable engineering tasks.
- Developed core application functionality using React, TypeScript, and C#, enabling publishers to track changes and receive system notifications.
- Worked in a collaborative engineering environment to design, implement, test, and refine software features based on project requirements and feedback.

PROJECTS

The Buzz App | *Java, React, Flutter, PostgreSQL*

- Led a cross-functional team of four to build a mobile and web social media application with Java, React, and Flutter.
- Enhanced user security by implementing OAuth2 with Google IDs to ensure robust authentication and safeguard user data.
- Ensured code reliability through rigorous testing protocols, including unit tests.
- Deployed application on Dokku for scalable cloud hosting.

Smart Parking System | *HTML, Javascript, CSS, TinkerCAD, SolidWorks*

- Led a team to integrate web development with IoT sensors and mechanical design for a smart parking solution.
- Developed a responsive parking reservation web application supporting real-time spot availability, reservations, dynamic pricing, and checkout calculations.

AgriVoice - Cursor Hackathon (*Best use of Ghana NLP award*) | *Python FastAPI, Nextjs*

May 2026

- Collaborated in a 3-person team to develop a voice-enabled application enabling Ghanaian farmers to access information in local languages.
- Integrated Ghana NLP / Khaya AI APIs for speech recognition, translation, and speech synthesis to support multilingual voice interactions.
- Won the Best Use of Ghana NLP / Khaya AI award for the team's innovative application of local-language AI technologies.

CAMPUS INVOLVEMENT

ACES Robotics
Cursor Community

January 2026 - Present
March 2026 - Present
